Process:

- 1.- We must place ourselves in front of the back of the team. Slide the latch (left and right) in the direction of the arrow.

- 2.- While holding the latch in place, pull the battery up in the direction of the arrow and lift it out.

- 3.- The battery has already been removed.

4.- Orientate the new battery as illustrated and align the pins with the edges of the battery compartment.

5.- Turn the battery in the direction of the arrow to insert it into the compartment.

6.- Slide the latch in the direction of the arrow into the lock position.
