## 1. - Model.

The following process is applied for the TTL ULTRAZERO.

**FIG. 1**

**FIG.2**

For this model fig.1, we need only these tools:

- Screwdriver Super-SNCM, 3.0x100mm.
- Cutter
- Pliers Super Ego 514 de 180 mm

## 2. – Result after disassembling all.

After we have disassembled the product:

**FIG. 3**

This is the list of the disassembling parts. The numbers in red meets the list.

1	Chassis Bottom Case	Plastic	8	Cable	Plastic/Metal
2	Chassis Top Case	Plastic	8.1	Top and Bottom Cover Power Supply	Plastic
3	Motherboard	Printed Circuit	8.2	Electrical Circuit	Metal
4	Battery	Metal	8.3	Cable Jacket Power Supply	Plastic
5	Memory RAM	Printed Circuit	8.4	Cable Insulation Power Supply	Plastic
6	External Ports	Metal	9	Hard Disk	Printed Circuit
7	Metal Support Top Case	Metal			

### 3. - Process step by step.

#### 3.1 Chassis Bottom Case.

Use the screwdriver to remove the screws and thus be able to separate the bottom cover.

FIG. 4

### 3.2 RAM Memory.

Use your hands to separate the RAM Memory from the rest of the device, as shown in the following images:

**FIG. 5**

### 3.3 Hard Disk.

Use the screwdriver to remove the screw.

Use your hands to separate the Hard Disk from the rest of the device.

### 3.4 Motherboard.

With the help of the screwdriver remove the screws that join the motherboard with the rest of the device.

**FIG. 6**

### 3.5 Battery.

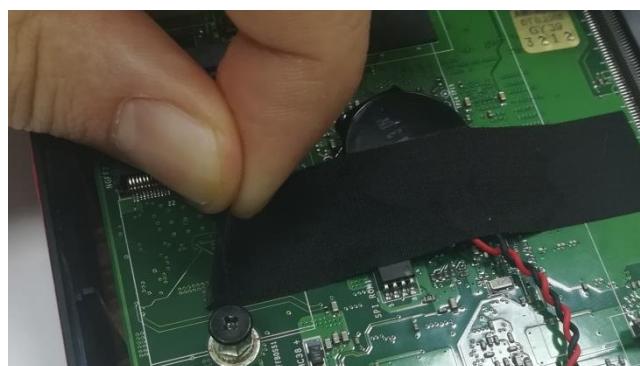

#### 3.4 Battery.

Remove the cable from the connector:

**FIG. 7**

Use your hands to separate the tape:

The battery is already completely extracted:

The protective plastic can also be removed with your hands:

### 3.6 Metal Support Bottom Case.

Use your hands to separate the metal support from the rest of the device, as shown in the following images:

**FIG. 8**

### 3.7 Power Supply.

#### 3.7.1 Use the cutter and the screwdriver.

An opening is created on the side with the cutter and then separated using the screwdriver.

**FIG. 9**

#### 3.7.2 We separate with our hands.

With the help of our hands we separate the plastic sides.

**FIG. 10**

#### 3.7.3 Results previous step.

Once we manage to separate the plastic covers we have these two elements:

**FIG. 11**

### 3.7.4 Cut the cable.

We cut the cable with scissors.

**FIG. 12**

### 3.7.5 Completed Process.

Finally we see all the pieces disassembled individually.

**FIG. 13**

### 3.7.6 Cable Disassembly.

First, the plug cable is cut, and then with the cutter we cut the cable coverage.

**FIG. 14**

### **3.7.7 Result.**

We get two cables: cable jacket (black) and cable insulation (white).

**FIG. 15**

## **4. - RAAW / WEEE.**

The composition of the elements must be taken account if they are going to be reused or recycled. To know that information visit the following URL:
